

Ideal for start-up companies, the Technology Incubation Program (TIP) has openings at the University of Connecticut Avery Point campus.

Entrepreneurs often find the most difficult task for them is getting their idea in motion. The UCONN Technology Incubation Program (TIP) gives entrepreneurial companies a chance to mobilize their idea by giving them a home and support through the University of Connecticut. By leveraging university technologies and facilities, the TIP enhances likelihood of success of start-up companies. Indeed, by joining the TIP a business benefits itself through access to the resources of a world class university.

To be considered the company must be technology-based and show a likelihood of progress and success in the next three-year period. The program currently has lab and office spaces available at the Avery Point campus.

Lab Description:

- **Size:** approximately 234 square feet
- **Equipment:** chemical fume hood and sink

- **Utilities:** hot, cold and DI water, gas, vacuum and compressed air. Multiple power outlets including 110 and 220V (accommodating single-phase or three-phase equipment up to 208 max). Phone and IT jacks provided
- **Room features:** benches, shelves, cabinets and windows in the lab space
- **Rate:** \$12 per square foot annually, with a \$2 increase per square foot per year. Heat and electrical included.
- **Other amenities:**
 - Business support
 - Access to a network of service providers
 - Environmental health and safety services including waste removal
 - Online and physical access to the UCONN libraries
 - Access to other equipment in faculty labs can be arranged
 - Use of Bioservices and other service centers available for reasonable fees (www.biotech.uconn.edu/)
 - Use of conference rooms, fax and copier
 - Animal facilities based on space available and faculty collaboration
